Mega capex program to yield rich dividends – initiate with BUY

We initiate coverage on Century Plyboards (CPBI) with BUY and a Sep'18 target of Rs 325. CPBI is the largest organised plywood player (along with Greenply) and third largest laminate player in India. A mega Rs 4.4bn capex program, which includes India's largest MDF plant commissioned in Oct'17, has transformed CPBI into a comprehensive wood panel solution provider. We expect a robust 16%/20% revenue/PAT CAGR over FY17-FY20, buttressed by a wide network (~16,500 dealers), diverse products and strong brands (A&P 3.5-4% of sales).

Set to reap benefits from the capex drive: CPBI will complete its Rs 4.4bn capex drive in FY18, which includes commissioning of an MDF plant and a 50% expansion of laminate capacity (to 7.2mn sheets). With this, the company will be in a position to offer one-stop wood panel solutions and consolidate its market dominance across product categories.

FY18 to be muted but recovery ahead: GST implementation and higher raw material prices for plywood will likely hit FY18 performance, but we expect CPBI to deliver a robust 20% earnings CAGR over FY17-FY20 driven by MDF and laminate expansion as well as the gradual shift to the organised market induced by GST (as much as 75% of India's Rs 180bn plywood market is unorganised).

Q2FY18 results subdued: CPBI reported tepid revenue growth of 2.6% YoY to Rs 4.7bn due to an 11.8% YoY drop in plywood revenues amid weak demand and a delay in re-stocking post GST. Operating margins contracted 57bps YoY – this coupled with higher interest and taxes caused PAT to drop 18.6% to Rs 401mn.

Initiate with BUY: CPBI is a play on the growing organised wood panel market in India. Our Sep'18 target price of Rs 325 is set at 27x Sep'19E EPS, which is in line with building material peers and the stock's 3-year average forward multiple.

Subdued growth in Q2FY18, MDF holds the key

CPBI reported lacklustre revenue growth of 2.6% YoY to Rs 4.7bn in Q2FY18, with the plywood segment declining 11.8% whereas laminates increased by 9.4% YoY. Lower plywood profitability caused a 57bps YoY dip in EBITDA margin to 15.6%, keeping EBITDA flat YoY while PAT decreased by 18.6% YoY.

Sluggish revenue growth due to decline in plywood sales

CPBI reported tepid revenue growth of 2.6% YoY mainly due to a decline in plywood revenues (-11.8% YoY) amid soft demand and a slower pace of re-stocking by dealers. The laminates segment grew at 9.4% YoY supported by a lower GST rate (~18%) whereas particle board grew at 350% YoY (on a lower base). As per management, dealer re-stocking remains slow as news reports indicate a potential cut in GST rates.

Management has guided for 20% growth in laminates and revenues of Rs 1.5bn-2bn from MDF in FY18. For FY19, the company expects laminates to post steady ~20% growth with stable operating margins and ~Rs 4bn in revenues from MDF accompanied by ~25% margins.

EBITDA flattish, PAT declines

CPBI reported flattish EBITDA at Rs 741 mn due to a 57bps YoY dip in operating margin. Higher raw material cost (+166 bps YoY) and employee cost (+75 bps YoY) hit margins, cushioned partly by lower operating expenses (-185bps YoY).

Plywood margins fell 156bps YoY due to raw material pressure in face veneer and some supply disruptions in the Assam unit. As per management, face veneer supply issues from Myanmar and also in the Assam unit will be resolved in Q4FY18, which should aid profitability. Laminate margins increased by ~10bps YoY. Management expects the company to deliver better blended margins ahead as the contribution from higher-value products such as MDF and particle board increases.

Q2 PAT declined 18.6% YoY on weak margins, higher interest cost (+31% YoY) and a higher tax rate YoY.

Earnings call highlights

Plywood

- CPBI witnessed continued competition from the unorganised segment in its plywood business as: (1) the e-way bill system under the GST regime, which could aid movement of goods, has not yet been introduced (expected in Apr'18) and (2) plywood attracts a higher GST rate of 28%.
- Management expect GST rates for plywood to be reduced from 28% to 18% over the next few months, which will be a big boost for the sector.
- CPBI is not looking to take any price hikes in the plywood segment in the near term due to tepid market conditions.

Laminates

- In laminates, the company saw increased traction in demand due to lower GST rates.

- Management plans to have the enhanced capacity operational in Q4FY18 which should aid 20%+ growth in FY19.
- The company has started to export low value laminates which should result in higher volume growth with lower realisations.

MDF

- The MDF plant has begun production and is expected to run at 75% capacity utilisation in Q3FY18. Management indicated that the response on product quality has been positive. CPBI plans to manufacture value-added MDF which should aid revenues and margins in future.
- The company currently earns an average realisation of Rs 23,000/cbm on MDF and has priced its product marginally lower (by ~1%) than Greenply Industries, the market leader in the segment.

Guidance

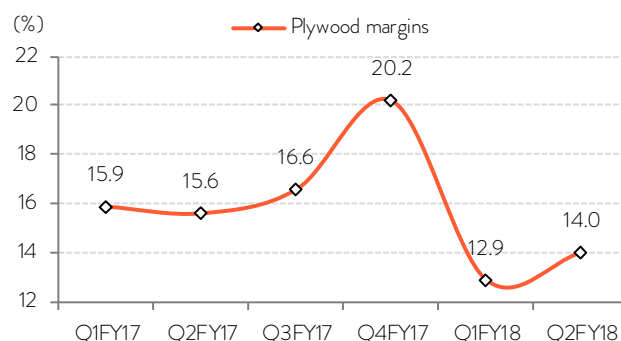

- Management is targeting Rs 1.5bn-2bn in revenues from MDF in FY18 and ~Rs 4 bn in FY19.
- The tax rate was higher in Q2 due to lower profitability from exempt units. The company believes its tax rate would be ~21% for the next few years.

Valuation methodology

CPBI is the joint market leader in India's organised plywood industry along with Greenply Industries. It is also the third largest laminate player in India and has recently set up the largest MDF plant in the country. With this facility, CPBI has evolved into the largest integrated wood panel company in India, equipped with a wide distribution reach, strong brand focus and comprehensive product portfolio.

CPBI's peer set comprises building material companies, which trade at an average FY19E P/E of ~27.4x. We believe the stock can attract a premium to peers given its high growth prospects and superior return profile (FY19 ROE of 24.8%) – our Sep'18 target price of Rs 325 is set at 27x Sep'19E EPS (vs. the 3-year average P/E of ~26x). Initiate with BUY.

RELATIVE STOCK PERFORMANCE

Source: Bloomberg

Key risks

- **Failure to stabilise MDF plant:** CPBI has recently entered into the manufacturing of MDF. A failure to stabilise the plant and run it at optimum capacity will adversely affect performance.
- **Regulatory concerns on raw material sourcing:** Wood is a key raw material for plywood and MDF manufacturing. Any regulatory restriction on sourcing of wood/face veneer will affect the company's profitability.
- **Sharp rise in raw material prices:** Higher raw material prices and an inability to pass these on to consumers may hurt profitability.
- **Prolonged slowdown in housing market:** A continued slowdown in the housing market would hit growth prospects.
